

**The Enforcement Division**

*Presents Course # 220*

# **Compliance Assurance Monitoring**

On October 22, 1997, US EPA promulgated the CAM Rule, 40 CFR Part 64, which addresses monitoring for certain large emissions units at Major Sources. CAM is intended to ensure these sources perform monitoring sufficient to give a “reasonable assurance of compliance” with applicable emissions requirements.

The CAM Rule potentially applies to all emissions units at Title V facilities. In this course, CAM concepts like CAM background, applicability, exemptions, CAM timing, monitoring design criteria, frequency of monitoring, source, District & US EPA roles in evaluating CAM plans, and quality improvement plans will be discussed. Interactive classroom exercises will help to familiarize attendees with selecting and reviewing the major components of a CAM Plan. There is **NOT** a field trip associated with this class.

## ***March 17, 2010***

**8:30 AM - 4:30 PM**

**California Air Resources Board  
1001 I Street, 5<sup>th</sup> floor, Training Rm. 5  
Sacramento, CA 95814**

***This class will be webcasted.*** If unable to attend in-person, please visit the following link after registration confirmation to sign-in and download course materials to be discussed in-class.
